

# DORO 1381

## WHY DORO

While other brands like to talk about stunning displays, amazing cameras or the latest technology with the cool new name, we like to talk more about simplicity. That's what our fans – people who feel the effects of ageing but remain young at heart – really want. It's why "EASY" is the key building block in every Doro's DNA, shaping every detail into a phone you'll love – including the ability to take great photos and to enjoy them on a big, beautiful screen. They're also expertly tuned to suit the more mature ear.

## HEAR IT. SEE IT. LOVE IT.

No matter how young we stay at heart, age has a way of turning once easy tasks into frustrating chores. At Doro, our phones are born from the idea that using them should always be a breeze even when hearing, seeing or dexterity declines. That's why you will always find excellent standard features such as extra loud and clear sound, high contrast displays, easy to read buttons and a large, clear interface. And of course, the widely separated keys make typing easier. We focus on the chores, so you can focus on the fun stuff

## EASY MOBILE PHONE WITH WIDE DISPLAY

Doro 1381 is a 2G dual-SIM camera phone for people who prefer texting and viewing photos on a wider display or want to use two separate numbers on a single phone. The keypad's widely spaced, convex keys make dialling and texting easier, and a built-in assistance button provides extra peace of mind. There's an FM-radio for listening to news and entertainment, and a built-in torch for lighting the way.
